Abstract

Table of Contents

List of Tables

List of Figures

List of Abbreviations

Chapter 1: General Introduction 1-10

1.1 Nanotechnology: a general introduction

1.2 Properties of nanoparticles

1.3 Synthesis of nanoparticles

1.4 Characterization of nanoparticles

1.5 Applications of nanoparticles

1.6 Silver as an antibacterial agent

1.7 Gaps in existing research

1.8 Objectives

Chapter 2: Synthesis and Characterization of Silver Nanoparticles with Varying Physico-chemical Properties 11-38

2.1 Introduction

2.2 Chemical reduction method

2.2.1 Materials

2.2.2 Synthesis of Ag NPs with variation in size and surface capping

2.2.3 Characterization of Ag NPs

2.2.4 Results and discussions

2.3 Biological reduction method

2.3.1 Characterization of Ag NPs

2.3.2 Results and Discussions

2.4 Conclusion

Chapter 3: Antibacterial Activity of Silver Species against *Escherichia coli* K12 39-60

3.1 Introduction

3.2 Material and methods

3.2.1 Materials

3.2.2 Bacterial growth curve

- 3.2.3 Dissolution kinetics of Ag NPs
- 3.2.4 Antibacterial tests
- 3.3 Results and discussion
 - 3.3.1 Bacterial growth kinetics
 - 3.3.2 Dissolution kinetics of Ag NPs
 - 3.3.3 Antibacterial assay
 - 3.3.3.1 Minimum inhibitory concentration (MIC) assay
 - 3.3.3.2 Minimum bactericidal concentration (MBC) assay
- 3.4 Conclusion

**Chapter 4: Effect of Silver Species on the Cell Machinery of
Escherichia coli K12**

61-100

- 4.1 Introduction
- 4.2 Materials and methods
 - 4.2.1 Materials
 - 4.2.2 Preparation of bacterial culture
 - 4.2.3 Biochemical studies
 - 4.2.3.1 ROS generation analysis
 - 4.2.3.1 Membrane damage analysis
 - 4.2.4 Differential gene expression studies
 - 4.2.5 Kinetics of cellular intake of silver ions
 - 4.2.6 Statistical analysis
- 4.3 Results and discussions
 - 4.3.1 Biochemical assays
 - 4.3.2 Differential gene expression studies
 - 4.3.3 Kinetics of cellular uptake of silver
- 4.4 Conclusion

**Chapter 5: Transcriptomic Analysis of *Escherichia coli* K12 Under
the Exposure of Lysozyme Coated Silver Nanoparticles**

101-134

- 5.1 Introduction
- 5.2 Material and methods
 - 5.2.1 Materials
 - 5.2.2 Preparation of bacterial culture and exposure to L-Ag NPs
 - 5.2.3 RNA sequencing analysis
 - 5.2.4 Transmission electron microscopy
 - 5.2.5 Statistical analysis
- 5.3 Results and Discussion

5.3.1	RNA sequencing analysis	
5.3.2	Validation of RNAseq data by qRT-PCR	
5.3.3	Transmission electron microscopy (TEM) of bacterial cell	
5.3	Conclusion	
Chapter 6: Antibacterial Mechanism of Lysozyme Coated Silver Nanoparticles against <i>Klebsiella pneumoniae</i> MGH78578		135-168
6.1	Introduction	
6.2	Materials and methods	
6.2.1	Materials	
6.2.2	Preparation of bacterial culture	
6.2.3	Antibacterial tests	
6.2.4	Biochemical studies	
6.2.4.1	ROS generation analysis	
6.2.4.2	Membrane damage analysis	
6.2.5	Kinetics of cellular intake of silver ions by <i>K. pneumoniae</i>	
6.2.6	RNA sequencing	
6.2.7	Transmission electron microscopy	
6.2.8	Statistical analysis	
6.3	Results and Discussion	
6.3.1	Bacterial growth kinetics	
6.3.2	Antibacterial activity	
6.3.3	Biochemical assays	
6.3.4	Kinetics of cellular uptake of silver by <i>K. pneumoniae</i>	
6.3.5	RNA sequencing analysis	
6.3.6	Validation of RNAseq data by qRT-PCR	
6.3.7	Transmission electron microscopy (TEM) of bacterial cell	
6.4	Conclusion	
Chapter 7: Summary and Future Scope		169-171
References		172-189
Appendices		
	Appendix I: List of Publications	
	Appendix II: Brief Biography of the Supervisor	
	Appendix III: Brief Biography of the Candidate	
	Appendix IV: Reprint of Publications
