

Acknowledgements

The opportunity to participate in the scientific research is a great privilege and one of the greatest opportunity in my life. This journey would not have embarked without the early encouragement, blessings and support from my teachers and mentor. First of all, I would like to express my sincere gratitude to my supervisor Dr. Tapomoy Guha Sarkar Associate professor, Department of Physics, BITS Pilani, Pilani Campus for his comprehensive discussions and suggestive advices. Under his sometimes kind and sometimes strict tutelage, I could continue my research life for past six years. He stood with me in my difficult time and gave me strength at that time. His guidance and training has been extremely valuable for my growth of becoming an independent researcher.

I would like to offer special gratitude to the erudite members of my Doctoral Advisory Committee Dr. Biswanath Layek and Dr Madhukar Mishra for their support, critical review, and suggestions during the progress review and to review my draft thesis.

I sincerely thank Dr. Navin Singh, and Dr. Jayendra N Bandyopadhyay for useful advices and support. I deeply thank Dr. Rakesh Choubisa, Head of Department of Physics and Dr. Manjuladevi V. as DRC Convener also, for their persistent support. Also, I wish to express my gratitude to all the past HODs, DRC conveners, and faculty members of the physics department for their kind support time-to-time. The technical staff of the department RajeevJi, Srikant Ji and Kundan are very supportive, and I must thank them for their help.

I would humbly express my regards to the Vice-Chancellor, Director and Deans of Birla Institute of Technology & Science (BITS), Pilani for providing me the opportunity to pursue my doctoral studies by providing necessary facilities and technical support. I express my gratitude to all the present and past Deans and Associate Deans of AUGSD for their constant technical support in organizing my research work.

I should thank my friend Dr. Anjan Kumar Sarkar Post Doctoral fellow in RRI, Bangalore, for useful discussions. I also thank all the co-scholars, seniors and my friends for always giving me moral support

diversified help, and several light-hearted moments which will always be remembered.

Finally, I would like to give my deeply gratitude to my family, my father and mother for supports and encouragements over my life. Thanks to their understanding for my research life and encouragement, I could spend my Ph.D life and open up a new life as a researcher.
