

Acknowledgements

First and foremost, I would like to express my humble gratitude and sincere thanks to my supervisors, Dr. Abhijit Asati and Prof. Chandra Shekhar, for their valuable guidance, encouragement, suggestions and moral support throughout the period of this research work. It has been a privilege for me to work under their guidance and learn from them.

Next, I would like to express my deep sense of satisfaction to BITS Pilani, Deemed University, and NXP Semiconductors, Noida for providing all the necessary facilities and support to complete the research work. My special thanks to Prof. Souvik Bhattacharya, Vice-Chancellor, BITS Pilani and Prof. Sudhirkumar Barai, Director, BITS Pilani, Pilani campus, for allowing me to pursue my research successfully. I also express gratitude to my management team, colleagues, and support staff at NXP Semiconductors, Noida who motivated me to pursue my doctoral research at BITS Pilani and supported me throughout the journey with all the necessary infrastructure, tools, etc.

I am thankful to Prof. M.B Srinivas, Dean, and Prof. Jitendra Panwar, Associate Dean, Graduate Studies and Research (Ph.D. Program), for providing all necessary guidelines and extending full support which was crucial for the completion of this thesis. I would like to thank all faculty members of the Electronics and Electrical Engineering Department, especially the head of department Prof. Hitesh Dutt Mathur and my Doctoral Advisory Committee members, Dr. Vinay Chamola and Dr. Meetha V Shenoy, who provided their regular support by attending my progress presentations and providing very constructive feedback to steer the research in the right direction. Their feedback in improving the quality of this thesis is also much appreciated.

Last but not least, I am also thankful to my family and my friends for their constant support and sacrifices during this tenure.
