<b>Abstract</b>	<b>vii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Objectives of the thesis . . . . .	4
1.2 Basic population models . . . . .	5
1.2.1 Malthusian model . . . . .	5
1.2.2 Logistic model . . . . .	5
1.2.3 Prey-predator model . . . . .	5
1.3 Functional response . . . . .	6
1.4 Some useful definitions . . . . .	7
1.5 Mathematical tools used in the thesis . . . . .	8
1.6 Bifurcation . . . . .	11
1.7 Delay differential equations . . . . .	13
<b>2 Modelling the Effect of Fear in a Prey-predator System with Prey Refuge and Gestation Delay</b>	<b>15</b>
2.1 Introduction . . . . .	15
2.2 Evolution of Mathematical Model . . . . .	18
2.3 Dynamics of Non-delayed Model (2.1) . . . . .	20
2.3.1 Positivity and boundedness of the solution . . . . .	20
2.3.2 Existence of equilibrium points . . . . .	23
2.3.3 Stability analysis . . . . .	24
2.3.4 Periodic orbit . . . . .	27
2.4 Dynamics of Delayed Model (2.2) . . . . .	29
2.4.1 Local stability and Hopf-bifurcation . . . . .	29
2.4.2 Global stability . . . . .	31

2.5	Direction and Stability of Hopf-bifurcation . . . . .	33
2.6	Numerical Simulation . . . . .	38
2.7	Conclusion . . . . .	44
<b>3</b>	<b>Global Stability and Hopf-bifurcation of Prey-predator System with Two Discrete Delays Including Habitat Complexity and Prey Refuge</b>	<b>47</b>
3.1	Introduction . . . . .	47
3.2	The Model Construction: Non-delayed Model . . . . .	49
3.3	Dynamics of Non-delayed Model . . . . .	52
3.3.1	Positivity and boundedness of the solution . . . . .	52
3.3.2	Persistence . . . . .	53
3.3.3	Equilibrium points and their stability analysis . . . . .	55
3.3.3.1	Existence of equilibrium points . . . . .	55
3.3.3.2	Local stability analysis . . . . .	56
3.3.3.3	Global stability analysis . . . . .	57
3.4	The Delayed Model . . . . .	59
3.4.1	Local stability and Hopf-bifurcation . . . . .	60
3.5	Direction and Stability of Hopf-bifurcation . . . . .	65
3.6	Global Asymptotic Stability for the Delayed System . . . . .	69
3.6.1	Global stability of one delayed model (i.e. $\tau_1 > 0, \tau_2 = 0$ ) . . . . .	69
3.6.2	Global stability of two delayed model . . . . .	71
3.7	The influence of prey refuge . . . . .	73
3.8	Numerical Simulation . . . . .	75
3.8.1	Non-delayed system . . . . .	75
3.8.2	Delayed system . . . . .	76
3.9	Conclusion . . . . .	83
<b>4</b>	<b>Optimal Harvesting Policy of a Prey-predator Model with Crowley-Martin Type Functional Response and Stage Structure in the Predator</b>	<b>85</b>
4.1	Introduction . . . . .	85
4.2	Mathematical model and its qualitative properties . . . . .	86
4.3	Analysis of Equilibria . . . . .	90
4.4	Stability Analysis . . . . .	93
4.5	Optimal Harvesting Policy . . . . .	95
4.6	Numerical Results . . . . .	99
4.7	Conclusions . . . . .	104

<b>5</b>	<b>Dynamics of Prey-predator Model with Stage Structure in Prey Including Maturation and Gestation Delays</b>	<b>107</b>
5.1	Introduction	107
5.2	Construction of Mathematical Model	110
5.3	Dynamics of non-delayed model	112
5.3.1	Positivity and boundedness of the solution	112
5.3.2	Equilibrium points	115
5.3.3	Stability Analysis	117
5.4	Analysis of delayed model	119
5.4.1	Local stability and Hopf-bifurcation	119
5.5	Direction and Stability of Hopf-bifurcation	128
5.6	Numerical Simulation	133
5.6.1	Non-delayed system	133
5.6.2	Delayed system	137
5.7	Conclusion	144
<b>6</b>	<b>Dynamics of Prey-predator Model with Strong and Weak Allee Effect in the Prey with Gestation Delay</b>	<b>147</b>
6.1	Introduction	147
6.2	Model formulation	150
6.3	Dynamics of non-delayed systems	151
6.3.1	Positivity and boundedness of model system (6.2)	152
6.3.2	Local stability and Hopf-bifurcation	153
6.3.2.1	Existence of equilibrium points	153
6.3.2.2	Local stability analysis	153
6.3.2.3	Hopf-bifurcation analysis	155
6.3.3	Dynamics of weak Allee effect model	156
6.4	Local stability and Hopf-bifurcation of delayed models	158
6.5	Stability and direction of Hopf-bifurcation	161
6.6	Numerical simulation	163
6.6.1	Non-delayed models	164
6.6.1.1	Strong Allee effect	164
6.6.1.2	Weak Allee effect	166
6.6.2	Delayed models	168
6.6.2.1	Strong Allee effect	168
6.6.2.2	Weak Allee effect	170
6.7	Conclusion	171

<b>7</b>	<b>Stability and Bifurcation of a Prey-predator System with Additional Food and Two Discrete Delays</b>	<b>173</b>
7.1	Introduction . . . . .	173
7.2	Proposed Mathematical Model . . . . .	175
7.3	Dynamics of Non-delayed Model . . . . .	176
7.3.1	Boundedness and persistence of the solution . . . . .	176
7.3.2	Equilibrium points and their stability behavior . . . . .	179
7.3.3	Hopf-bifurcation and its properties . . . . .	185
7.3.4	Numerical simulation . . . . .	192
7.4	Analysis of Delayed Model . . . . .	197
7.5	Direction and Stability of Hopf-bifurcation . . . . .	202
7.6	Numerical Simulation of Delayed Model . . . . .	207
7.7	Conclusion . . . . .	212
<b>8</b>	<b>Modelling the Effect of Fear and Hunting Cooperation in a Prey-predator System with Cooperation and Anti-predation Response Delay</b>	<b>215</b>
8.1	Introduction . . . . .	215
8.2	Formulation of mathematical model . . . . .	218
8.3	Preliminaries . . . . .	221
8.4	Dynamical behavior of non-delayed model . . . . .	224
8.4.1	Existence of equilibrium points . . . . .	224
8.4.2	Stability analysis . . . . .	227
8.4.3	Bifurcation analysis . . . . .	228
8.4.4	Global stability . . . . .	232
8.5	Analysis of delayed model . . . . .	234
8.6	Computer simulations . . . . .	238
8.7	Conclusion . . . . .	255
	<b>Conclusions and future directions</b>	<b>259</b>
