

## ACKNOWLEDGMENTS

First and foremost, I dedicate my thesis to my parents and my younger brother Vineeth, who guided and encouraged me to pursue a Ph.D. and who is everything to me.

It gives me immense pleasure to thank Dr. Trilok Mathur, who is my supervisor, Assistant Professor, Department of Mathematics, Birla Institute of Technology and Science, Pilani. I am honored to have such a supervisor who is very professional at work and is immensely talented. His great explanatory and oratory skills had helped me to understand very complex topics and generate new ideas. His overall command in various topics had enabled me to generate enthusiasm to learn multiple new topics. Further, his generous and obliging gestures had helped me in many difficult situations. His day to day, ethical research practices inspire me to adopt ethical conduct as a primary object of my doctoral work. I will try to keep up with his legacy and impart the lessons learned while working with him. He encourages free-thinking and allows independent research of any collaborator and respects different ideologies. His respect for fellow researchers and determination make collaboration quick and effective. He is one of the nicest human beings I had ever been with.

I would also like to acknowledge my co-supervisor, Dr. Shivi Agarwal, for her timely support and encouragement throughout the doctoral period. She is highly devoted to research and instrumental in guiding my research. The motivation which I received from her inspired me to perpetrate challenging assignments.

I express my gratitude to the Head of Department of Mathematics, Prof. B. K. Sharma, for his unconditional support and assistance. I genuinely admire his strike for balance between administration and research.

I am obliged to members of the Doctoral Advisory Committee (DAC) Prof. H.D. Mathur, Associate Professor, Department of Electrical and Electronics Engineering, BITS Pilani and Prof. Devendra Kumar, Associate Professor, Department of Mathematics, BITS Pilani for their invaluable guidance since the time of my research proposal and opening a path to do research

work. I would also like to thank every faculty of the Department of Mathematics for their warmth and friendly gestures.

I would like to thank DST-FIST vide SR/FST/MSI-090/2013(C) for providing infrastructure support and UGC for providing financial support as JRF (Ref. No:22/12/2013(ii)EU-V with Sr. No. 2121341012). Many thanks to Birla Institute of Technology and Science (BITS), Pilani, for assisting me with all the required facilities to complete the research work. I am extremely obliged to Prof. Souvik Bhattacharyya, Vice-Chancellor, BITS Pilani, for allowing me to do teaching and research at this esteemed institute. Under his leadership, BITS Pilani has been achieving significant milestones, which is always a motivating force for me to contribute towards the institute.

I would like to thank Prof. Sudhirkumar Barai, Director, BITS Pilani - Pilani Campus for his administration and his powerful motivation to many students on the campus.

I would like to extend my gratitude to Prof. Srinivas Krishnaswamy, Dean, Academic Graduate Studies & Research Division and Prof. Jitendra Panwar, Associate Dean, Academic Graduate Studies & Research Division. Because of their constant efforts, many research scholars can complete their research works successfully.

I would also like to thank all my friends in BITS Pilani for the encouragement and support throughout my journey. I especially want to thank Dr. Harish Puppala, who always had there with me during my highs and lows and for providing motivation.
