Abstract	ix
1 General Introduction	3
1.1 Motivation	3
1.2 Machining System	5
1.3 Basic Layout of Machining System	6
1.4 Machining System in Modernization	10
1.5 Machine Repair Problem	12
1.6 Redundant Machining System	14
1.7 Basic Elements of Queueing System	16
1.8 Some Important Process	18
1.8.1 Stochastic Process	19
Discrete-time Stochastic Process	19
Continuous-time Stochastic Process	19
State Space	19
1.8.2 Counting Process	19
1.8.3 Markov Process	19
1.8.4 Markov Chain	20
Continuous-Time Markov Chain	20
Discrete-Time Markov Chain	20
1.8.5 Poisson Process	20
1.8.6 Renewal Process	21
1.8.7 Birth and Death Process	21
1.8.8 Chapman-Kolmogorov Equation	21
1.8.9 Stationary State	21
1.8.10 Non-Stationary State	22
1.9 Some Standard Probability Distribution	22
1.10 Solution Techniques	25

1.10.1	Transient Solution Method	26
1.10.2	Runge-Kutta Method	26
1.10.3	Supplementary Variable Technique	27
1.10.4	Matrix Inversion Method	27
1.10.5	Matrix Analytic Method	28
1.10.6	Successive Over Relaxation	29
1.10.7	Eigenvalue and Eigenvector	30
1.10.8	Laplace Transform	30
1.11	Performance Characteristics of the Machining System	31
1.11.1	Queueing Characteristics	31
1.11.2	Reliability Characteristics	33
1.12	Different Arrangements in the Machining System	34
1.12.1	Redundancy	34
	Passive redundancy	34
	Active redundancy	35
	Mixed spare redundancy	35
1.12.2	K -out-of- $M:G$ system	35
1.12.3	K -out-of- $M:F$ System	35
1.12.4	(m, M) Machining System	35
1.12.5	N -Policy	36
1.12.6	T -Policy	36
1.12.7	D -Policy	36
1.12.8	F -Policy	36
1.12.9	Series System	37
1.12.10	Parallel System	37
1.13	Fuzzy Number and Fuzzy Arithmetic	38
1.14	Review of literature	41
1.14.1	Literature on Queueing theory of Historical Importance	42
1.14.2	Literature on Machine Repair Problem with Spare	42
1.14.3	Contributions in Machine Repair Problem with Switching Failure and Common Cause Failure	44
	Switching failure	44
	Common cause failure	45
1.14.4	Contributions in Machine Repair Problem with Imperfect Cov- erage and Reboot Delay	47
1.14.5	Fuzzy Machine Repair Problem	48
1.14.6	Machine Repair Problem with Vacation	50
1.14.7	Machine Repair Problem with Newton-quasi Method	52

1.14.8 Machine Repair Problem with Supplementary Variable	53
---	----

I TRANSIENT ANALYSIS OF REPAIRABLE MACHINING SYSTEM WITH SPARE PROVISIONING 57

2 Transient Analysis of Variant Abandon and Vacation Policy 61	61
2.1 Introduction	61
2.2 Model Description	66
2.2.1 Assumptions and Notations	66
Failure Process	66
Vacation Policy	66
Repair Process	67
Abandon Policy	67
2.2.2 Practical Justification of the Model	67
2.2.3 Chapman Kolmogorov Differential-Difference Equations	68
2.3 Transient Probabilities Analysis	72
2.4 Performance Measures	75
2.5 Sensitivity Analysis	77
2.6 Special Cases	78
2.7 Illustrative Example	78
2.8 Numerical Result	80
2.9 Conclusion	82

II STEADY-STATE ANALYSIS OF REPAIRABLE MACHINING SYSTEM WITH SPARE PROVISIONING 101

3 Steady Analysis of Switching and Reboot Delay 105	105
3.1 Introduction	105
3.2 Model Description and State Probabilities	109
3.2.1 Assumptions and Notations	109
3.2.2 Chapman-Kolmogorov Equation	110
3.2.3 The Steady-State Solution	114
3.3 Performance Measures	115
3.3.1 State Probabilities	115
3.3.2 Expectation	115
3.3.3 Queueing Measures	116
3.3.4 Expected Total Cost	117
3.4 Newton-Quasi Method	117

3.5	Numerical Result	119
3.6	Conclusion	122
4	General Repair Distribution for Imperfection	137
4.1	Introduction	137
4.2	Model Description	140
4.3	Steady-State Probabilities and Availability	141
4.4	Special Cases	148
4.5	Numerical Result	152
4.6	Conclusion	154
 III FUZZY ANALYSIS REPAIRABLE MACHINING SYSTEM WITH SPARE PROVISIONING		 169
5	Fuzzy Analysis of Unreliable Repair Facility	173
5.1	Introduction	173
5.2	Model Description	177
5.3	The Fuzzy System and Parametric NLPs	179
5.4	Numerical Example	183
5.5	Numerical Result	189
5.6	Conclusion	191
6	Fuzzy Analysis of Heterogeneous Repair Facilities	207
6.1	Introduction	207
6.2	Model Description	211
6.2.1	Failure Process	211
6.2.2	Repair Process	211
6.3	The Reliability Characteristics	213
6.3.1	Mean Time-to-Failure	213
6.3.2	Availability of the System	215
6.4	The Fuzzy Redundant Repairable System	217
6.5	Parametric Non-Linear Programs	219
6.6	Illustrative Example and Numerical Results	222
6.6.1	The Fuzzy Mean Time-to-Failure	222
6.6.2	The Fuzzy Availability of the System	223
6.6.3	Numerical Result	224
6.7	Conclusion	225
7	Conclusions and Future Work	235

7.1	Conclusions	235
7.2	Specific Contributions	236
7.3	Future Work	237
	Bibliography	238
	Publications	257
	Presented Works	260
	Brief Biography of the Candidate	262
	Brief Biography of the Supervisor	263
