

ACKNOWLEDGEMENTS

It is indeed, a privilege as well as a pleasant duty to express my gratitude to all those who have made it possible for me to complete this thesis. First and foremost, I would like to express my profound gratitude to my supervisor, Prof. Kuldip Singh Sangwan, for his keen interest and painstaking supervision throughout the period of this study. His incisive comments and insightful suggestions have helped me to remove many lacunae from my work and this thesis. I am grateful to him for his continuous efforts to inculcate the positive motivation in me and his continual guidance, generous support and patience, especially during the times of my slow progress. His teachings about art of research, professional morals and ethics, and other important aspects of life will always help me in shaping up my academic and research career.

I wish to thank Prof. Souvik Bhattacharyya (Vice-Chancellor, BITS Pilani), Prof. A. K. Sarkar (Director, BITS Pilani, Pilani Campus), Prof. Srinivas Krishnaswamy (Dean, Academic – Graduate Studies & Research Division), Prof. Jitendra Panwar (Associate Dean, Academic – Graduate Studies & Research Division) for giving me an opportunity to do the research in the area of my interest. I would also like to thank Prof. M. S. Dasgupta, (Head, Mechanical Engineering Department) and all faculties and staff members of Mechanical Engineering Department, BITS Pilani, Pilani Campus for their moral support and kind assistance. I am highly indebted to my Doctoral Advisory Committee (DAC) members Dr. Tufan Chandra Bera and Prof. Rajesh P. Mishra for their support and suggestions to carry out this work effectively. I would also like to acknowledge Dr. Sharad Shrivastava (Convener, Departmental Research Committee) for providing valuable comments during the departmental seminars.

My special word of thanks also go to Prof. Devika for providing her continuous support, guidance and encouragement, going out of her way. I also want to thank Dr. Prateek Kala and Dr. Varun Sharma for their continuous guidance and moral boosting to make me believe this is achievable.

I am also thankful to Prof. (Dr.) Christoph Hermann, Dr. Gerrit Posselt, Dr. Stefan Böhme, Mr. Max Juraschek, Mr. Lennart Buth, Mr. Alexander Leiden, Mr. Stefan Blüme, Ms. Mara Schwuchow and other colleagues from Institute for Machine Tool and Production Technology, Technische Universität Braunschweig, Germany for their continuous support and hospitality during my research stay at TU Braunschweig.

It has been a pleasure to work with Dr. Narpat Ram Sangwa, Dr. Kailash Choudhary, Dr. Rajni Singh, and Mr. Rishi Kumar. I want to thank them for their unstinting guidance, valuable suggestions and kind help at various stages of my work. I also thank the non-teaching staff, Mr. Rajendra Budania, Mr. K. C. Verma, Mr. Rajkumar Saini, and Mr. Mahender Kumar Saini for their valuable help and encouragement. I sincerely thank those persons whom I miss to acknowledge and who have directly or indirectly helped me to accomplish this task.

My heartfelt regards go to my parents Sh. Madan Lal Sihag and Smt. Santosh Sihag, parents-in-law Sh. Jwala Singh Bhakar and Smt. Saraswati Bhakar, family members Mr. Prashant Bhakar, Ms. Uma Sihag, Mr. Deepender Sihag, Dr. Swati Sihag and Dr. Dinesh Bhambhu. My sincere thanks to Ms. Himakshi and Master Parth, two little loving kids of my family. Their constant love and affection has empowered me to accomplish my work. I express my deepest gratitude to my husband Dr. Vikrant Bhakar for being my strength during my days of struggle. Without the support of my family, I would not have been able to complete much of what I have done. I pray and thank to ALMIGHTY GOD to bless me with inner strength and patience.

Nitesh Sihag
