Contents

1 Introduction **1**

1.1 Combinatorial Optimization 3

1.2 Metaheuristics 5

1.2.1 Introduction 5

1.2.2 Classification of Metaheuristics 7

1.3 Metaheuristic Algorithms 9

1.3.1 Evolutionary Computation 9

1.3.2 Tabu Search 10

1.3.3 Simulated Annealing 12

1.3.4 Ant Colony Optimization 13

1.4 ACO: Algorithms, Theory and Applications 14

1.4.1 ACO: Algorithmic Perspective 14

1.4.2 ACO: Theoretical Perspective 21

1.4.3 ACO: Application Perspective 23

1.5 Research Objectives 25

1.6 Structure of the Thesis 26

2 A New Approach towards ACO through Punishment Mechanism 27

2.1 Punished Elitist Ant System and Punished Rank Ant System . . . 28

2.1.1 Introduction 28

2.1.2 Punishment Mechanism 29

2.1.3 Punishment Mechanism in Elitist Ant System (EAS) and Rank Ant System (RAS) 31

2.1.4 Experimental Results and Performance Analysis 33
2.2 Performance Linked Elitist Ant System and Performance Linked Rank Ant System 41
2.2.1 Introduction 41
2.2.2 Machine Learning 41
2.2.3 The Elitist Ants Selection Mechanism 43
2.2.4 Performance Linked Elitist Ants Selection Mechanism 44
2.2.5 Performance Linked EAS and Performance Linked RAS . . . 45
2.2.6 Punishment mechanism in PLIEAS and PLIRAS 47
2.2.7 Experimental Results and Performance Analysis 48
2.3 Concluding Remarks 63

3 Cluster Integrated Updation Strategies for ACO Algorithms 66
3.1 Introduction 67
3.1.1 Evolution of Clusters 68
3.1.2 A Categorization of Clustering Methods 69
3.2 Clustering Algorithms 71
3.2.1 Statistical Information Grid (STING) 71
3.2.2 k-Means Algorithm 72
3.2.3 k-Medians Algorithm 74
3.2.4 Density Based Spatial Clustering of Applications with Noise (DBSCAN) 74
3.3 Integration of Clusters and ACO 77
3.3.1 Grid Structured ACO (GS-ACO) 78
3.3.2 k-Means ACO (kM-ACO) and k-Medians ACO (kMed-ACO) 79
3.3.3 Density Based Clustered ACO (DBC-ACO) 80
3.4 Experimental Study 81
3.4.1 Parameter Settings 81
3.4.2 Primary Updation 81
3.4.3 Secondary Updation 83
3.4.4 Performance Analysis of Algorithms 85

3.5 Concluding Remarks 92

4 Updation and Evaporation of Pheromone Trials 93

4.1 Introduction 94
4.2 Preliminaries 94
4.3 Temporal Effects on Evaporation Mechanism 95
4.4 Runtime Analysis 98
4.5 Concluding Remarks 100

5 Application of ACO to Train Scheduling Problem 101

5.1 Introduction 102
5.2 Railway Transportation as an Optimization Problem 103
5.2.1 Railway Planning as an Optimization Problem 103
5.2.2 Constraints in Train Scheduling Problem 108
5.3 Literature Review 110
5.3.1 Railway Scheduling 110
5.3.2 Orienteering Problem (OP) 112
5.4 A Model for Train Scheduling Problem 112
5.4.1 Definitions 113
5.4.2 Notations 114
5.4.3 Variables 115
5.4.4 Objective function 115
5.4.5 Assumption 116
5.4.6 Input 117
5.5 ACO framework for Train Scheduling Problem 117
5.5.1 Tour Construction 119
5.5.2 Pheromone Updation 119
5.6 Experimental Study 120
5.6.1 Parameter Settings and Input to the Algorithm 122
5.6.2 Result Analysis of Algorithms for Fixed Commercial Waiting Time 123

5.6.3 Result Analysis of Algorithms for Variable Commercial Waiting Time . . . 139
5.7 Concluding Remarks . . . 152

6 Conclusion and Future Work **155**
6.1 Overview . . . 156
6.2 Summary of Contribution . . . 156
6.3 Future Work . . . 157
