

ACKNOWLEDGEMENTS

I am grateful to the almighty for giving me the confidence, faith, and guidance through various people and situations, which has helped me to produce this research work.

I express my deep sense of gratitude and sincere thanks to my supervisor, Prof. Ajit Pratap Singh, Dean, Academic-Undergraduate Studies (AUGS), BITS Pilani, for his valuable support, guidance, suggestions and encouragement, which has been my core in producing this valuable piece of research work. He has always influenced me by realizing different ways to accomplish the research objectives, besides his busy work schedules. He taught me to be patient and persistent in achieving any task I undertake. One of the most important thing which learnt from him is, to be a better human being always no matter what circumstances life has to offer. He has been constant source of encouragement for me to deliver my best, which has helped me to enhance the quality of my research work. I have learnt so many things from him, but his open heartedness and his ability to help whomsoever needs, has always been my source of revelation to be better version of me. It is rare to find such human being who can deliver knowledge in all spectrums of life to his students in the easiest possible way. I am really privileged to have been his student and to receive his valuable guidance. No matter whatever I accomplish, he will always be my core of inspiration. I could not have imagined having a better advisor and mentor other than him.

I also like to acknowledge my gratitude and sincere thanks to my co-supervisor, Prof. A. K. Sarkar, Director, BITS Pilani - Pilani Campus, for giving me his valuable support, guidance, suggestions and encouragement at appropriate times, throughout the time period of my research work. It has been my privilege to work under his valuable direction. His guidance has enabled me to achieve my research objectives to the best. I am grateful to Prof. Anshuman Shrivastava, Head of Civil Engineering Department for his valuable support, input and encouragement throughout my research work and also thankful for being the member of my Doctoral Advisory Committee (DAC). I am also thankful to Dr. Priyansh Singh for his valuable advice and inspiration, as the member of my Doctoral Advisory Committee (DAC). I also take this opportunity to thank all the faculty members of the Civil Engineering Department for their encouragement and support.

I deeply express my much appreciations to Birla Institute of Technology and Science (BITS), Pilani for providing me all the necessary facilities to complete the research work. I am extremely

grateful to Prof. Souvik Bhattacharyya, Vice Chancellor, BITS Pilani for giving me an opportunity to peruse my research work successfully at this very reputed Institute. I also express my gratitude to Prof. Srinivas Krishnaswamy, Dean, Academic-Graduate Studies and Research and Prof. Jitendra Panwar, Associate Dean, Academic-Graduate Studies and Research, for their valuable support throughout my Ph.D. program. I also wish to acknowledge all the non-teaching staff members for their cooperation during the preparation of my thesis. I also express my thanks to fellow research scholars, Dr. Pankaj Munjal, Dr. Himanshu Chawla, Mr. Harish Puppala, Mr. Raunak Mishra for their valuable suggestions and inputs during my research. I deeply express my gratitude to Mr. K. K. Mishra, Executive Engineer, PWD Rajasthan for support in providing the relevant maps required for the research.

I am grateful to my beloved parents Mr. Mahadev Wagale and Mrs. Mayura Wagale, for their unconditional love, affection, encouragement and support over the years, for being my core and sacrificing their personal comforts to shape my future. Finally, I am so very fortunate having blessed with a very understanding and caring friends, Mr. Ashish Jain and Ms. Vidhi Vyas. They have always motivated, inspired me through their best efforts to achieve my goals. Their undoubted support holds a key role in producing this piece of work.

(Makrand Wagale)
