<b>Acknowledgements</b>	<b>i</b>
<b>Abstract</b>	<b>iii</b>
<b>Table of contents</b>	<b>v</b>
<b>List of figures</b>	<b>ix</b>
<b>List of tables</b>	<b>xiii</b>
<b>List of symbols and abbreviations</b>	<b>xv</b>
<b>Chapter 1 : Introduction</b>	<b>1</b>
1.1 Background of the work	1
1.4 Organization of the thesis	9
<b>Chapter 2 : Literature review</b>	<b>11</b>
2.1 Introduction to microgrid	11
2.2 Resource estimation	15
2.2.1 Prediction and mapping of wind potential	19
2.2.2 Prediction and mapping of solar potential	21
2.3 Resources optimization	23
2.3.1 Wind farm layout optimization	24
2.3.2 Solar field layout optimization	25
2.4 Energy management techniques for microgrid operations	27
2.4.1 Model predictive control	28
2.4.2 Mixed integer linear programming	31
2.4.3 Game theory	33
2.4.4 Particle swarm optimization	35
2.4.5 Hybrid optimization model for electric renewable	37
2.5 Research gaps identified	40
2.6 Objectives of the study	41
2.7 Scope of the study	41
2.7 Methodology adopted for the study	42
<b>Chapter 3 : Resources estimation and mapping – wind</b>	<b>46</b>
3.1 Data analysis	46

3.2 Methodology applied	50
3.2.1 ANN approach	51
3.2.2 GIS approach	53
3.3 Estimation of wind speed	54
3.4 Mapping of wind speed	68
3.5 Regions with high wind potential	72
3.6 Land use and land cover analysis for wind farm	74
3.7 Summary	76
<b>Chapter 4 : Resources estimation and mapping – solar</b>	<b>78</b>
4.1 Data collection	78
4.2 Methodology adopted	83
4.2.1 ANN approaches	83
4.2.2 GIS approach	85
4.3 Estimation of solar radiation	85
4.4 Mapping of solar potential	94
4.5 Land use and land cover estimation	99
4.6 Summary	103
<b>Chapter 5 : Optimal use of resources</b>	<b>104</b>
5.1 Wind farm layout optimization	104
5.1.1 Turbine modeling	105
5.1.2 Optimization function	109
5.1.3 Genetic algorithm	111
5.1.4 Data analysis	113
5.2 WFLO results	115
5.2.1 Constant wind speed in one direction	115
5.2.2 Constant wind speed in multiple directions	116
5.2.3 Variable wind speed in one direction	118
5.2.4 Cost and power generation	120
5.3 Solar power generation optimization	120
5.3.1 Data analysis	121
5.3.2 Modeling of solar power generation	122
5.3.3 Solar field layout optimization	123
5.4 Excel-based model for optimal utilization of solar potential	126

5.4.1 Estimation of electrical load for a small semi-urban community	127
5.4.2 Assessment of roof-top solar power	129
5.5 Summary	130
<b>Chapter 6 : Energy management system for microgrid</b>	<b>131</b>
6.1 Load profile	131
6.2 Modeling of microgrid system	133
6.2.1 Components of microgrid	133
6.2.1.1 Photovoltaic panels	133
6.2.1.2 Wind turbines	134
6.2.1.3 Li-ion battery	135
6.2.1.4 Diesel generator	136
6.2.1.5 Biogas generator	136
6.2.1.6 Fuel cell (hydrogen storage system)	136
6.2.2 Financial aspect of the different component	137
6.2.3 Economic variables	138
6.2.4 Alternate scenarios	138
6.3 Scenario analysis	139
6.3.1 Scenario A: wind + diesel + li-ion battery + AC-DC	139
6.3.2 Scenario B: PV + diesel + li-ion battery + AC-DC	141
6.3.3 Scenario C: PV + wind + li-ion battery + AC-DC	142
6.3.4 Scenario D: wind + fuel cell + electrolyzer + hydrogen tank + DC-AC	143
6.3.5 Scenario E: PV + fuel cell + electrolyzer + hydrogen Tank + DC-AC	144
6.3.6 Scenario F: Biogas generator	145
6.3.7 Scenario G: PV + wind + li-ion battery + diesel+ biogas + DC-AC	146
6.4 Comparison of scenarios and IRES analysis	148
6.5 Feasibility of realistic and futuristic scenarios	151
6.6 Summary	153
<b>Chapter 7 : Summary and Conclusions</b>	<b>154</b>
7.1 Summary of results	154
7.2 Conclusions	161
7.3 Specific contributions	162
7.4 Further scope of work	163

<b>References</b>	<b>164</b>
<b>Appendices</b>	
I. Geographical information of 28 weather monitoring stations	A-1
II. Monthly mean meteorological data of a representative station	A-2
III. Monthly mean meteorological data used for prediction of wind speed	A-3
IV. Monthly mean meteorological data used for prediction of solar radiation	A-13
V. Methodology used for solar field layout optimization	A-20
VI. Snapshots of excel based model	A-24
VII. Monthly load profile of Thumkunta village	A-27
