

Acknowledgment

My heartfelt and foremost gratitude is expressed to my supervisor Prof. Bijay Kumar Rout and for welcoming me onboard on this stimulating research, and for being the best supervisors I could ever wish for. My first words of utmost appreciation go to my advisors, for his help, support and guidance from the beginning of my research work. I am grateful for his contributions in driving me to excel and improve my research methodology while encouraging me to be creative. I offer my respect for all his valuable guidance, excellent direction, everlasting encouragement and inspiration given to me without which the present work would not have been possible.

I am grateful to Prof. Souvik Bhattacharyya (Vice-Chancellor, BITS-Pilani), Prof. Sudhirkumar Barai (Director, BITS-Pilani, Pilani Campus) for their support and blessings. I also express my sincere thanks to Prof. Jitendra Panwar (Associate Dean, Academic Graduate Studies and Research Division) for their motivation, constant support and encouragement. I thank Prof. Mani Shankar Dasgupta, Head of the Department of Mechanical Engineering for his valuable support and guidance. I am highly indebted to Prof. Srikanta Routroy (Dean, Student Welfare Division) for his encouragement and suggestions. I express sincere thanks to Dr. Venkatesh KP Rao (DRC Convener) Department of Mechanical Engineering. I pay my heartfelt gratitude to my DAC members Prof. Sudeept Mohan and Dr. Arun Kumar Jalan for their valuable suggestions and for sparing their valuable time for departmental evaluation of this thesis. I would also like to acknowledge all faculty members as well as non-academic staff of Department of Mechanical Engineering for their support, encouragement and cooperation. I would like to particularly appreciate BITS-CRIS staff Mr. Tulsi Ram Sharma, Pilani Campus for helping me in fabricating equipment's of my research work. It is my pleasure to acknowledge the individuals who have contributed to the evolution of this work.

I thank my fellow lab mates in Autonomous Driving Vehicle Research Group and Humanoid (AcYUT) Research Group: Mr. Sabyasachi Dash, Mr. Subodh Sai, Mr. Shankara Narayan V, Mr. Prateek Garg and Mr. Sanjeev Singla for the stimulating discussions, for the sleepless nights we were working together before deadlines and for all the fun we have had in the last five years. I owe my gratitude to fellow research scholars Dr. Almesh Kadokol and Dr. Manikandan of BITS for their constant support. I express my thanks to my colleague of Mechanical Department Mr. Chetan Jalendra for his continuous support and encouragement in taking the work forward.

I express my sincere thanks to Mr. Santosh Kumar Saini (Alumni Relations Division, BITS, Pilani) for his cooperation during my Ph.D. work and word processing of the thesis.

I would like to thank and appreciate my elder brother Mr. Kishore Chandra Das and Mr. Jitendra Kumar Das (JIJU) and my loving sister Mrs. Rashmita Kumari Das for their support. Finally, but most importantly, to my parents, Mr. Purnna Chandra Das and Mrs. Bharati Das, who have been there through thick and thin, before and after. Last but not the least, I pray and thank the Almighty for showering His divine blessings and giving me an inner strength and patience.

SANGRAM KESHARI DAS
