

ACKNOWLEDGEMENTS

I want to extend sincere gratitude to my supervisor, Prof. Sangeeta Sharma, for her constant guidance in completing my thesis. No work of such magnitude would have been possible without her sincere efforts. I thank her for guiding me and motivating me towards accomplishing the thesis, particularly the freedom to look beyond and explore the field critically. It is a pleasure working with her.

I want to thank and express my earnest gratitude to my co-supervisor, Dr Tanu Shukla, for her immense support and motivation. I owe my gratitude to her for guiding me towards ideating and planning the study, particularly with the study's conceptualisation and introducing me to statistics, concepts, and research philosophy. Her words have always inspired me to be confident.

I am grateful to the faculty members in my doctoral advisory committee, Professor Gajendra Singh Chauhan, and Professor Sushila Shekhawat, for their insightful comments and encouragement. Their suggestions have widened my research from various perspectives, especially the news media aspect. I also offer my sincere gratitude to Professor Virendra Singh Nirban for his insights on statistics and its execution on the field data and the essential pointers for the study. I want to thank Prof. P.C. Shukla, Director, Institute of Education, Bundelkhand University, to shape the idea of integrating different research stakeholders and providing the theoretical framework. I also owe my gratitude to Dr Mukesh Gupta, Obstetrician & Gynaecologist, Le'Nest Advance Medical Centre, Mumbai, for helping me to understand the health and communication framework.

I also extend my gratitude to our Head of Department, Prof. Devika Sangwan, for her support and motivation. I like to thank all the Research Scholars for their continuous support. I would

also like to thank the office staff of the Department of HSS, Mr Anil, Mr Ramesh, and Mr Prakash, for constantly extending the administrative help, and I thank them for their kindness.

I would also extend my gratitude to the BITS Pilani Central Library for providing ample resources for the thesis. I would also like to thank Professor P. Geetha Rani sincerely, the National Institute of Education Planning and Administration (NIEPA) New Delhi, to introduce econometrics and provide insights into my doctoral work. I would also like to thank Prof. Mukul Asher, the National University of Singapore, for his insights on public policy. I want to thank Dr L.N. Venkataraman, Department of Public Policy, TERI, for his insights on reading theories, particular John Rawls.

The administrative staffs of the Directorate of Health Services, Government of Assam, were extremely cooperative in issuing permission to survey the borderland region. I want to thank Krishnashri Gogoi for helping me to access the Ministry of Health and Family Welfare for permission to conduct research. I offer special thanks to State Media Expert, National Rural Health Mission, Guwahati, for providing district-wise and village-wise data on healthcare for my thesis. I thank all the ASHAs and Anganwadi workers of Karimganj, Dhubri and South Salmara for their support and full co-operation during my fieldwork.

I must specially mention my friends, without whom this PhD journey would not have been possible. I want to thank Ms Divya Dosaya for every fruitful discussion and debate on topics related to statistics. We have learned together with some vital statistical and methodological concepts, which will help me grow further. I want to thank Ms Mounika and Priyanka for every argument we had on topics related to health, well-being, and economics. I am grateful to Mr Shubham Kumar (IIPS-Mumbai) for his support and introduction to STATA. He provided me with the insight to learn STATA and its syntax. I want to express my sincere gratitude to my childhood friend Dr Bedanga Talukdar (IIPS-Mumbai), for his constant support and insights

on field related complexities. I thank Mr Mayuresh Bhise, Victor Saha and Upendra Singh for continuous support during my stay in the hostel. I sincerely thank them all.

Finally, I owe my gratitude to my mother, Mrs Kalpana Nath, who has provided immense moral, emotional and financial support all round my life. I would like to sincerely thank Dr Gayatri Tamuli for being the pillar of my strength and inspiration before and during the entire PhD period. I sincerely thank my sister Mrs Dipsikha Nath and brother-in-law Mr Bhanu Das for their constant support and taking care of my mother when I am away from home.

Nayan Jyoti Nath
