

ACKNOWLEDGEMENTS

The work in this thesis would not have been possible without the constant support, guidance, and mentorship of my supervisor Dr. Rishikesh Vaidya. Throughout my program at BITS Pilani, he has provided me with an atmosphere of academic freedom which enabled me to pursue my interests under his guidance. He always lent me a very patient ear, and extended full support. I feel very deeply thankful to him. I wish to thank my DAC members Prof. R.R.Mishra, and Dr. Biswanath Layek for encouragement, and discussions.

I am grateful to faculty members, research scholar friends, and the office staff members of the Physics Department.

I feel grateful to my parents for love and support. No words of thanks can be enough for all the support I have received from my friends Girish, Joe, and Rickmoy over several years.

I received financial support from Council of Scientific and Industrial Research - Human Resource Development Group under the NET-scheme, I am thankful to them.
