Certificate	i
Dedication	ii
Acknowledgements	iii
Abstract	vi
Table of Contents	ix
List of abbreviations	xvi
List of Tables	xix
List of Figures	xxiii
1. Introduction and overview	1
1.1. Background	1
1.2. Science communication	2
1.3. Scientists as science communicators	7
1.4. Constitutional and science policy background to the study	10
1.5. The Problem	12
1.6. Aim and objectives of research	14
1.7. Overview of research methodology	15
1.8. Significance and scope of the study	16
1.9. Thesis structure	18
2. Literature Review	20
2.1. Introduction	20
2.2. Science communication: An overview	20

2.3. Why science communication?	25
2.4. Defining science communication	30
2.5. Models and approaches in science communication	32
2.6. Science, society and culture: An Indian policy perspective	36
2.7. Science and the media	40
2.8. Science communication as an academic discipline	44
2.9. Policies for science communication	48
2.10. Science communication in India	55
2.11. Scientists' importance of science communication	61
2.12. Scientists' sense of moral duty, role, and responsibility	62
2.13. Science communication by institutions	64
2.14. Science communication by scientists	65
2.15. Impact of science communication on scientists' careers	69
2.16. Major factors affecting science communication by scientists	69
2.17. Scientists' interactions with the public/media	75
2.18. Training in science communication	76
2.19. Need for science communication specialists	77
3. Research methodology	79
3.1. Introduction	79
3.2. Research strategy, design and method	79
3.3. Population	83
3.4. Sampling	84
3.5. Email databases	85
3.6. Questionnaire instrument: development and testing	85

3.7. The final questionnaire and its structure	88
3.8. Survey execution and data collection	94
3.9. Analysis of survey data	97
3.10. Limitations of the research method	98
4. Results and Data Analysis	100
4.1. Introduction	100
4.2. Demographic description of the study sample	100
4.2.1. Summary of the demographic profile of the sample	100
4.2.2. Gender profile	103
4.2.3. Age profile	103
4.2.4. Educational profile	103
4.2.5. Current affiliation	104
4.2.6. Affiliations – Type of institution/employer	104
4.2.7. Primary position	105
4.2.8. Research experience	106
4.2.9. Peer-reviewed research publications	107
4.2.10. Mother tongue	108
4.2.11. How English was learned	109
4.2.12. Academic discipline	109
4.2.13. Independent variables for further analysis	109
4.3. Science communication, media, and society	110
4.3.1. Importance of science communication	110
4.3.2. Objectives of science communication	113
4.3.3. Different ways of science communication	115

4.3.4. Current coverage of science in Indian media	117
4.3.5. Attitudes toward science and society interactions	118
4.4. Role and responsibility in science communication	120
4.4.1. Disseminating research results to society as part of job	120
4.4.2. Moral duty to inform the taxpayers	123
4.4.3. Scientists and their responsibility for communication	125
4.4.4. Main responsibility for communicating science	127
4.5. Scientists' engagement with the general public and the media	129
4.5.1. Frequency of scientists' overall active engagement	129
4.5.2. Frequency of overall PE activities by institutions	131
4.5.3. Frequency of scientists' public engagement activities during last year ..	133
4.5.4. How easy is science communication?	136
4.5.5. Overall experience in science communication activities	137
4.5.6. Future engagement in science communication	138
4.5.7. The possible impacts of science communication	139
4.5.8. Personal attributes for science communication performance	141
4.5.9. Rating own engagement in science communication	142
4.6. Impact of public engagement on scientists' career advancement	143
4.6.1. Science communication and its impact on scientists' career	144
4.6.2. Are scientists engaging with the public 'publicists'?	145
4.6.3. Is science communication important for career advancement?	146
4.7. Factors affecting scientists' active engagement in science communication	147
4.7.1. Do institutions encourage scientists to communicate science?	148
4.7.2. Science communication by close colleagues	149
4.7.3. Are many colleagues active science communicators?	150

4.7.4. How supportive are colleagues, and family and close friends for science communication?	152
4.7.5. Is your research too complex for the public?	153
4.7.6. Potential factors preventing active engagement	154
4.7.7. Skilfulness in communicating science through different media	156
4.7.8. Willingness to participate in science communication activities in future	157
4.8. Training in Science Communication	159
4.8.1. Ever trained in science communication?	160
4.8.2. Have enough training to engage with the public/media?	161
4.8.3. Would science communication training help in better public engagement?	162
4.8.4. Willing to attend science communication/media training?	163
4.9. Interventions for enhancing science communication by Indian scientists	164
4.9.1. Potential interventions for enhancing scientists' engagement	164
4.9.2. Responses to the open-ended question	169
5. Discussion and Interpretations	191
5.1. Introduction	191
5.2. Objective 1 – Science communication, its importance and roles and responsibilities of scientists	193
5.3. Objective 2 – Science communication by scientists and its impact on their career advancement	211
5.4. Objective 3 – Factors affecting scientists' active engagement in science communication with the general public and media	222

5.5. Objective 4 – Needed interventions for enhancing science communication by Indian scientists	230
6. Conclusions and Recommendations	235
6.1. Introduction	235
6.2. Objective 1 – Science communication, its importance and roles and responsibilities of scientists	236
6.3. Objective 2 – Science communication by scientists and its impact on their career advancement	238
6.4. Objective 3 – Factors affecting scientists’ active engagement in science communication with the general public and media	240
6.5. Objective 4 – Needed interventions for enhancing science communication by Indian scientists	242
6.6. Implications	244
6.7. Limitations of the study	246
6.8. Recommendations	248
6.8.1. For individual scientists	248
6.8.2. For R&D institutions	249
6.8.3. For government and funding agencies	251
6.8.4. For academic institutions	253
6.8.5. For the media and press	255
6.8.6. For science communicators	255
6.9. Future research	256
6.10. Concluding remarks	257
