List of figures	xvi
Nomenclature	xviii
List of Abbreviations	xix
CHAPTER 1: INTRODUCTION	1
Background of the study	1
1.1 Demand side management	1
1.2 Smart grid	5
1.3 Clean Development mechanism	6
1.4 Time of use	7
1.4.1 Benefits of Time of Use	12
1.5 Root top & streetlight solar	13
1.5.1 Description of different components of installed PV	14
system	14
1.6 Renewable Energy Sources	17
1.7 Problem Statement	19
1.8 Objectives of the Research	20
1.9 Methodology Adopted	21
1.10 Scope and Limitation	22
1.11 Organization of the Thesis	23
CHAPTER 2: LITERATURE REVIEW	25
2.1 Demand Side management	25
2.2 Clean Development mechanism	30

2.2.2 Carbon Discharges in China 40   2.3 Renewable Energy in Emerging Economies 41   2.4 Time of Use 45   2.5 Energy Efficient Electrical device: Air conditioners 47   2.6 Roottop Solar PV 47   2.6.1 Case Study: Rooftop PV system for textile industry 53   2.7 Agricultural Energy consumption in Turkey 57   2.8 Agricultural Economic Growth and Energy Consumption in India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3 Cost-Effectiveness for Consumers 66   3.3.1 State of electricity costs and consumer tariffs in India 67   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.4.4 Average cost of power & Average realization 74   3.5 Environmental and Social Impact Assessment 75   3.6 Long term Savings 81   3.7 Different Types of DSM Measures 82   3.7.1 Industrial and commerci	2.2.1 Carbon Emissions, Economic Growth, energy consumption,	37
2.3 Renewable Energy in Emerging Economies 41   2.4 Time of Use 45   2.5 Energy Efficient Electrical device: Air conditioners 47   2.6 Roottop Solar PV 47   2.6.1 Case Study: Rooftop PV system for textile industry 53   2.7 Agricultural Energy consumption in Turkey 57   2.8 Agricultural Economic Growth and Energy Consumption in India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3 Cost-Effectiveness for Consumers 66   3.4 Gains to Utilities 69   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.4 Average cost of power & Average realization 74   3.5 Environmental and Social Impact Assessment 75   3.6 Long term Savings 81   3.7 Different Types of DSM Measures 82   3.7.1 Industrial and commercial DSM practices 82   3.7.2 Challenges of implementation of DSM programs	trade and urbanization in EU	
2.4 Time of Use 45   2.5 Energy Efficient Electrical device: Air conditioners 47   2.6 Roottop Solar PV 47   2.6.1 Case Study: Rooftop PV system for textile industry 53   2.7 Agricultural Energy consumption in Turkey 57   2.8 Agricultural Economic Growth and Energy Consumption in India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3 Cost-Effectiveness for Consumers 66   3.4 Gains to Utilities 69   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.5.1 External costs of power & Average realization 74   3.7 Different Types of DSM Measures 82   3.7.1 Industrial and commercial DSM practices 82   3.7.2 Challenges of implementation of DSM programs 85	2.2.2 Carbon Discharges in China	40
2.5 Energy Efficient Electrical device: Air conditioners 47   2.6 Roottop Solar PV 47   2.6.1 Case Study: Rooftop PV system for textile industry 53   2.7 Agricultural Energy consumption in Turkey 57   2.8 Agricultural Economic Growth and Energy Consumption in India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3.1 State of electricity costs and consumer tariffs in India 67   3.4 Gains to Utilities 69   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.5.1 External costs of power & Average realization 74   3.7 Different Types of DSM Measures 82   3.7.1 Industrial and commercial DSM practices 82   3.7.2 Challenges of implementation of DSM programs 85	2.3 Renewable Energy in Emerging Economies	41
2.6 Rootop Solar PV 47   2.6.1 Case Study: Rooftop PV system for textile industry 53   2.7 Agricultural Energy consumption in Turkey 57   2.8 Agricultural Economic Growth and Energy Consumption in India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3 Cost-Effectiveness for Consumers 66   3.3.1 State of electricity costs and consumer tariffs in India 67   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.5.1 External costs of power & Average realization 74   3.6 Long term Savings 81   3.7 Different Types of DSM Measures 82   3.7.1 Industrial and commercial DSM practices 82   3.7.2 Challenges of implementation of DSM programs 85	2.4 Time of Use	45
2.6.1 Case Study: Rooftop PV system for textile industry 53   2.7 Agricultural Energy consumption in Turkey 57   2.8 Agricultural Economic Growth and Energy Consumption in India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3 Cost-Effectiveness for Consumers 66   3.3.1 State of electricity costs and consumer tariffs in India 67   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.4.4 Average cost of power & Average realization 74   3.5.1 External costs of power generation 78   3.6 Long term Savings 81   3.7.1 Industrial and commercial DSM practices 82   3.7.2 Challenges of implementation of DSM programs 85	2.5 Energy Efficient Electrical device: Air conditioners	47
2.7 Agricultural Energy consumption in Turkey 57   2.8 Agricultural Economic Growth and Energy Consumption in India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3 Cost-Effectiveness for Consumers 66   3.4 Gains to Utilities 69   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.4.4 Average cost of power & Average realization 74   3.5.1 External costs of power generation 78   3.6 Long term Savings 81   3.7.1 Industrial and commercial DSM practices 82   3.7.2 Challenges of implementation of DSM programs 85	2.6 Roottop Solar PV	47
2.8 Agricultural Economic Growth and Energy Consumption in 61   India 61   2.9 Research Gap Identified 63   CHAPTER 3: RESEARCH METHODOLOGY 64   3.1 Demand side management options 64   3.2 Technical Feasibility and Data Collection 65   3.2.1 Data collection 66   3.3 Cost-Effectiveness for Consumers 66   3.3.1 State of electricity costs and consumer tariffs in India 67   3.4.1 Generation utilities 69   3.4.2 T&D and AT&C Losses (%) 71   3.4.3 Distribution companies 72   3.4.4 Average cost of power & Average realization 74   3.5 Environmental and Social Impact Assessment 75   3.5.1 External costs of power generation 78   3.6 Long term Savings 81   3.7.2 Challenges of implementation of DSM programs 85   CHAPTER 4: HARNESSING SOLAR ENERGY 88	2.6.1 Case Study: Rooftop PV system for textile industry	53
India612.9 Research Gap Identified63CHAPTER 3: RESEARCH METHODOLOGY643.1 Demand side management options643.2 Technical Feasibility and Data Collection653.2.1 Data collection663.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs88	2.7 Agricultural Energy consumption in Turkey	57
India2.9 Research Gap Identified63CHAPTER 3: RESEARCH METHODOLOGY643.1 Demand side management options643.2 Technical Feasibility and Data Collection653.2.1 Data collection663.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	2.8 Agricultural Economic Growth and Energy Consumption in	61
CHAPTER 3: RESEARCH METHODOLOGY643.1 Demand side management options643.2 Technical Feasibility and Data Collection653.2.1 Data collection663.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs88	India	01
3.1 Demand side management options643.2 Technical Feasibility and Data Collection653.2.1 Data collection663.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY	2.9 Research Gap Identified	63
3.1 Demand side management options643.2 Technical Feasibility and Data Collection653.2.1 Data collection663.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY		
3.2 Technical Feasibility and Data Collection653.2.1 Data collection663.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY	CHAPTER 3: RESEARCH METHODOLOGY	64
3.2.1 Data collection663.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY	3.1 Demand side management options	64
3.3 Cost-Effectiveness for Consumers663.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY	3.2 Technical Feasibility and Data Collection	65
3.3.1 State of electricity costs and consumer tariffs in India673.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY	3.2.1 Data collection	66
3.4 Gains to Utilities693.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY	3.3 Cost-Effectiveness for Consumers	66
3.4.1 Generation utilities693.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.3.1 State of electricity costs and consumer tariffs in India	67
3.4.2 T&D and AT&C Losses (%)713.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.4 Gains to Utilities	69
3.4.3 Distribution companies723.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.4.1 Generation utilities	69
3.4.4 Average cost of power & Average realization743.5 Environmental and Social Impact Assessment753.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.4.2 T&D and AT&C Losses (%)	71
3.5 Environmental and Social Impact Assessment753.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.4.3 Distribution companies	72
3.5.1 External costs of power generation783.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.4.4 Average cost of power & Average realization	74
3.6 Long term Savings813.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.5 Environmental and Social Impact Assessment	75
3.7 Different Types of DSM Measures823.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.5.1 External costs of power generation	78
3.7.1 Industrial and commercial DSM practices823.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.6 Long term Savings	81
3.7.2 Challenges of implementation of DSM programs85CHAPTER 4: HARNESSING SOLAR ENERGY88	3.7 Different Types of DSM Measures	82
CHAPTER 4: HARNESSING SOLAR ENERGY 88	3.7.1 Industrial and commercial DSM practices	82
	3.7.2 Challenges of implementation of DSM programs	85
4.1 Harnessing Solar Energy 88	CHAPTER 4: HARNESSING SOLAR ENERGY	88
	4.1 Harnessing Solar Energy	88

4.2 Benefits of Solar Power Generation	88
4.2.1 Trials/challenges of conventional solar power generation	90
4.3 Technology Background	91
4.3.1 Economics of solar system	92
4.3.2 Cash flow diagram	92
4.3.3 Equivalence formula involving time value of money	94
4.3.4 Limitations of solar photovoltaic energy conversion	94
4.4 Types of Solar Technology	95
4.4.1 Pros and cons of the technologies	97
4.5 Connection of Roof Top Solar System In Tata Power Delhi	98
Distribution Limited, Delhi	20
4.5.1 Benefits for Rooftop owners	102
4.6 RoofTop Solar Installations For Demand-Side Management	103
4.6.1 Model Description	107
4.6.2 Results and discussion	111
4.6.3 Conclusion	113
CHAPTER 5: TECHNICAL ANALYSIS OF DSM OPTIONS	115
5.1 DSM Efficient Air Conditioners	115
5.1.1 Baseline scenario	117
5.2 DSM Rooftop Solar Photovoltaic Systems	123
5.2.1 System Description	123
5.3 PM Kusum Scheme	136
5.4 Energy-efficient Appliances and ToU, Jalgaon Household appliances	143
- A case study	
CHAPTER 6: RESULTS AND DISCUSSION	146
6.1 Results and Discussion	146
6.2 Rooftop Solar	147
6.2.1 Results & Discussion	148
6.2.2 Conclusion and Future Prospects	150
6.3 Optimum Efficiency Levels	150

6.4.1 Room air conditioners	153
6.4.2 Rooftop solar PV system with batteries	153
6.4.3 Solar pumps	154
6.4.4 Household appliances, A Case Study of energy conservation,	154
ToU and improvement in energy efficiency	154
6.5 Interference and Recommendation	156
6.5.1 Policy related	156
6.5.2 Air Conditioning	157
6.5.3 Energy efficiency in residential appliances	157
6.5.4 PM Kusum Scheme	158
6.5.5 Household Appliances, Jalgaon City Case Study	158
CHAPTER 7: CONCLUSIONS AND FUTURE SCOPE OF	150
THE WORK	159
7.1 Conclusions	159
7.2 Rooftop Solar Jalgaon MIDC Case Study	160
7.3 Solar Pumps, PM Kusum Scheme, Component C	162
7.4 Room Air Conditioners	162
7.5 Rooftop Solar PV System with Batteries	163
7.6 Solar Pumps	163
7.7 Household Appliances -A Case Study Of Energy Conservation, ToU,	164
and improvement in Energy Efficiency	164
7.8 Interference and Recommendations	165
7.8.1 Policy related	165
7.8.2 Air conditioning	166
7.8.3 PM Kusum Scheme	167
7.8.4 Household appliances, Jalgaon City Case Study	167
7.9 Future Scope of the Work	168
