

Acknowledgments

I would like to express my sincerest thanks and deepest appreciation for my supervisor Dr. Subhashis Gangopadhyay, who had kindly accepted me as a Ph.D. student. Under his able guidance, I learned about various aspects of research. I had his full support and help in all the ups and downs I faced during this period. His invaluable suggestion, excellent supervision, constant encouragement, continuous support, and unabashed discussion in nurturing the work and during the preparation of the manuscript have helped me a lot during my Ph.D. Under the guidance of Dr. Subhashis Gangopadhyay, my learning experience during the Ph.D. at Birla Institute of Technology & Science (BITS), Pilani campus was outstanding.

I extend my sincere thanks to my Co-Supervisor Dr. Ajay Agarwal for arranging the necessary permissions and access to laboratory facilities in CSIR-CEERI, Pilani to perform gas sensing related research work. Again, I would like to acknowledge Dr. Ajay Agarwal for his valuable suggestions and guidance to improve the quality of my research as well as the thesis. I would also like to thank Dr. Rahul Prajesh and Mr. Vikas Saini (B. Tech. Student) for their help during the gas sensing measurements in CEERI Pilani.

I am also thankful to Dr. Anshuman Dalvi and Dr. D. D. Pant, Department of Physics, BITS Pilani for their kind help in allowing me to use the necessary laboratory facilities (XRD and UV-Vis spectroscopy) during my research work.

I would like to thank Dr. Arnab Hazra, Department of EEE, BITS Pilani for his guidance in the research work related to gas sensors and providing me with the necessary facilities for this work. Also, thanks to Dr. Prateek and Ms. Teena Gakhar (Ph.D. student) for their help and support in the work related to the preparation of finger mask and contact which was required for my research work.

I express my sincere thanks to Dr. Surojit Pande and Dr. Mrinmoyee Basu, Department of Chemistry, BITS Pilani, who helped me in the research work related to chemistry (Photo-catalysis application and chemical process).

I am thankful to the authorities of BITS Pilani for giving me the necessary permissions and providing financial support for this research work. Also, I gratefully acknowledge the *DST-FIST* sponsored powder XRD support of the Department of

Physics and the Vacuum deposition system of the Department of Mechanical Engineering of BITS Pilani for the X-ray diffraction studies and thin-film depositions, respectively. I am also thankful for the instrumental support from Université of Bremen Germany (*XPS*, *SEM*, and *TEM*), IISc Bangalore (*UV-Vis* Spectroscopy), and Material Research Center (MRC), MNIT Jaipur.

A very great thanks to the Department of Physics, University of Rennes 1, France for providing the financial support for my international visit funded by European project '*FP7-People-IRSES MSNano network*'. A grateful thanks to Soraya Ababou-Girard, Pascal Turban, Bruno Lepine, University of Rennes 1, France for their guidance, and help to perform the experiments (*STM*, *XPS*) in their research laboratory. Also, thanks to Didier Sebilliau for his help to complete the academic formalities as well as for taking care of the residential arrangements during my stay in Rennes, France.

Special acknowledgments would be given to my two dearest friends Late Ms. Ritika Sharma and Mr. Pradeep Yadav for their constant support and help, not only in research but also in day to day life. Also, I would like to thank Mr. Mayanglambam Dinachandra and Dr. Munesh Rathore, Dr. Shivani Choudhary, all my friends and colleagues for their encouragement.

I wish to thank the entire non-teaching staff members, Department of Physics, BITS Pilan, for their timely help during my research work. Last but not the least, I would like to acknowledge all the people, who helped either directly or indirectly for the completion of my thesis work.

Finally, I wish to express my deep gratitude and love to my parents for their constant support and encouragement not only during my Ph.D. but also in my life. I would like to express my sincere gratitude and love to my parents. It is their hard work and moral support that has always inspired me and given me the strength to deal with hurdles as they come in my life. I thank my parents for respecting and supporting my decisions and always being with me especially in hard times of my life. This success would not have been possible without them. Also thanks to my beloved son, who gives me the strength to do the best especially in the tough times of my life.
