

Acknowledgements

I am deeply grateful to my thesis supervisor Prof. Devendra Kumar for his encouragement, guidance and constant support throughout my work. In particular, I would like to thank him for being an endless source of information and for teaching me the scientific writings and helping me to improve my presentation skills as well. He always motivated me to learn new techniques, knowledge of which really helped in my Ph.D. work. I could not have imagined having a better advisor and mentor for my Ph.D. study.

Besides my supervisor, I am also thankful to doctoral advisory committee (DAC) members Dr. Ashish Tiwari and Prof. B. K. Sharma for their insightful comments and encouragement. Their valuable comments and suggestions during various progress seminars have significantly enhanced the quality of my research work. Whenever I contacted them, they were very kind, patient and were always available to clarify my doubts despite their busy schedules. I sincerely thank Prof. B. K. Sharma, Head of Department and Prof. Rakhee, DRC Convener for their persistent support. Also, I wish to express my gratitude to Prof. Chandra Shekhar, Prof. Balram Dubey and all the other faculty members of mathematics department for their kind support and cooperation during my research work.

I would like to express my sincere gratitude to my seniors (Priyanka Kumari, Manddeep Singh, Sachin Kumar, Bhavya Tripathi, Swati Sharma, Amit Kumar, Shreekanth Varshney, Satyendra Singh Chauhan and Kocherlakota Satya Pritam) for their encouragement, cooperation and moral support. I would like to extend my warm thanks to all my friends in mathematics department as well as in other departments for their moral support, diversified help and several light-hearted moments which will always be remembered.

I would humbly express my regards to the Vice-Chancellor, Director, Deans, Associate Deans and Unit Chiefs of Birla Institute of Technology and Science (BITS), Pilani for providing me the opportunity to pursue my doctoral studies by providing necessary facilities and financial support. All other staff members of AGSRD, Mr. Raghuvver and Mr. Mahipal are also gratefully thanked for their help.

Special thanks go to my parents for their constant love and encouragement. My parents have shaped who I am today and supported me through every endeavor. A big thanks go to my brothers Sombir and Devender and sister-in-laws Santosh and

Urmila for supporting me spiritually throughout this journey.

My heartfelt thanks to my husband, Mr. Vivek Poonia, who has always stood by me, I want to thank him for his unconditional support. He is a great source of inspiration to me. More importantly, I have greatly appreciated his kind words when I need them most.

I would like to grab this opportunity to express my deep sense of gratitude to my in-law family members for their love, constant inspiration and encouragement, without their cooperation I would never been successful in achieving this goal. The study would have been not so successful without the help of Dr. Amar Singh and Dr. Monika Poonia (Brother and Sister in law) who helped me a lot to start that journey.

There is an active and passive role of many people who helped me to arrive at this milestone. I may have forgotten to mention their names, but the help they offered has certainly made a home in my heart. I am reminded that the completion of this thesis represents the closing of one memorable phase of my life, but a new and more rewarding phase awaits.

I am thankful to Department of Science and Technology (DST INSPIRE), New Delhi and BITS Pilani for financial assistance as a part of this work.

Lastly, I am very grateful to God for all the blessings in my life.

Parvin Kumari
